Das Schweigen brechen - To break the silence
title

Task of the student competition of the Messeakademie
The winding tower of the pit "Paul II", built in 1915, is a landmark of the underground lignite mining practiced in the Zeitz-Weißenfels area from 1860-1947.
In 1959 the building was shut.
The building and its surrounding are to be revitalized and supplemented.
Task:
The aim of this architecture studio course is to determine potential new uses for the existing building and to develop designs for the building and its immediate context.
Aim of the course:
- Site analysis with due consideration of historical urban development.
- Building analysis including understanding of the historical context.
- Proposing a new use and developing an appropriate space allocation program
- floor plans, sections, elevations, explanations of the construction, and perspectives as well as design models are required
